Personal Statement: As a Health Psychologist, my research is focused on communication and relational factors associated with shared decision making and patient centered care in older populations. I want to understand the goals and personal experiences of patients, and how clinicians obtain and use that information to encourage active patient involvement in shared decision making and to deliver patient centered care. My expertise in quantitative methods and qualitative methods inform my role as Associate Director for Education and Evaluation in the VA Salt Lake City Geriatric Research, Education and Clinical Center (GRECC), and research I direct measuring patient centeredness in patient-provider interactions in VA.
